

BIG FOUR MILLS 1000 TONS OF ORE

Much Activity Among the Various Mines of the Camp—Machinery and Equipment Arriving.

The Steen, Poak and Cicala lease on the Big Four last week started milling 1000 tons of ore at the War Eagle mill. So far the ore is plying over \$40 per ton, and the leasers believe this run will prove one of the best ever made from the lease. The ore was taken from between the 300 and 400-foot levels from a 14-foot ledge that, if anything, gives indications of widening with depth. The flow of water at the lease was heavy for several weeks, taxing the large pumps to their capacity, but to date it is decreasing and is now about 30 per cent less than two weeks ago. About 100,000 gallons of water was pumped every day.

Great Activity.

At the Sly-Green lease on the Union 2 the leasers are still sinking their incline shaft and are swinging it over to the east in an effort to bring the ore shoot recently tapped a few feet from the shaft, into the shaft and thus facilitate the removal of the ore. The showings continue good.

At the White Caps lease the work of hoisting ore is again in progress and the lease is making ready for a large run at the War Eagle mill. Immediately after it has undergone repairs.

James Pierce, Jesse Harris and Joe Thomas have taken over the Reid lease on the Earl and now have work well under way. A whim has been installed and the work will be done in the old Stanley shaft, 50 feet deep, and a drift run from that point.

Dan Volvidi is taking out ore from his lease on the Union No. 2 ground. The ore is being removed from the shaft at a depth of 120 feet, and is of a good milling grade.

Thomas ("Dry Wash") Wilson is interested with Mr. Volvidi in the lease.

George S. Barton and Jack Cox, who have a lease on the Union No. 3 claim of the Litigation Hill Merger company, have their shaft down 28 feet and expect in a few days to tap the ledge, which at surface gives good pinnings and is believed to be much richer with depth.

Bath Bros.' Lease.

At the Bath brothers' lease on the Union No. 2 the work of sinking is still in progress, and a depth of 280 feet has been attained. Ore is being taken from the shaft as sinking continues and about 100 tons of good milling grade ore are now on the dump. The last run of 381 tons returned an average value of \$20.90 per ton, and the next milling, it is believed, will bring a higher average, as the ore is becoming richer with more depth. At the Bath brothers' Earl lease, drifting is now being done at 100-foot level, where a shoot of ore, the width of which has not yet been determined, is giving up some high-grade milling ore. An assay recently made from some of the ore gave a value of \$200, and the leasers believe that a milling will show the average value of the body to be close to \$50 per ton.

Hoisting Ore.

The War Eagle company, which has a lease on the Union No. 9 claim of the Dexter company, continues steady operation. The lease is looking as good now as it has for months and good-sized dump of filling ore is again accumulating. From the old Plamenaz shaft, work is being prosecuted in the south drift at the 230-foot level, where the miners are drifting on what is known as the footwall vein. Between the 230 and 200 levels stopping out ore is in progress. Some good ore is being taken from the old Shea vein at a depth of 230 feet and hoisted through the Plamenaz shaft. About twenty men are employed at the lease.

New Mill.

Last week a force of ten men was put to work breaking ground for the milling plant and sampler to be erected by the Associated Milling company. The work of construction will be in charge of Chas. Kirchen and he is now in camp. He states that by the first of the year the mill buildings will be up, and the sampler in operation by February. The first load of cement for the concrete foundations is expected to arrive in a few days.

Bookman Busy.

Joe Bookman is doing surface

prospecting by trenching on the east side group belonging to W. H. Robinson and associates. This acreage, which joins Mineral Hill territory on the northeast, has been productive of some exceedingly rich float. The unusual amount of alluvial drift makes the task of exposing bedrock rather a difficult process, but Mr. Bookman has enough encouragement from the indications to keep after the veins which he knows belong there.

Machinery Arriving.

The bulk of heavy machinery, which constitutes the San Francisco shipment for the Mineral Hill Consolidated company, arrived on the ground last week. It consists mainly of a 30-horse-power Pooos gasoline engine, a 9 by 12 Sullivan compressor and a couple of Ingersoll-Rand machine drills for level work. The tunnel, which is being carried full six feet in width, is now in 265 feet. There is something more than 500 feet to go before tapping the big vein system, which has its most notable outcrop in the Burr-Thomas ore shoot.

PERSONALS

Comings and Goings of Our Local People and Others

Letson Balliet, wife, son and daughter, returned from a visit to New York and Chicago Sunday morning. Mr. Balliet says that capital is now letting 90 per cent of industrial securities go and seeking mining investments.

E. S. Van Leer, a prominent business man of Elko, who has been in Tonopah on mining business for the past few days, returned to Elko this morning.

McL. Carter, the well-known mining man of Ellendale, has returned from California and will go out to his mines in a few days.

Mrs. H. E. Epstine returned on this morning's train from San Francisco, where she has been visiting for the past week.

E. P. Wilson returned from Stockton this morning, where he has been looking after his land tract sales. James Golden of Klondike is in town.

LITTLE BOY HAS SUCCESSFUL OPERATION

Last Sunday Dr. McLeod performed a very successful operation upon 6-year-old Lee Douglas, son of Mr. and Mrs. W. J. Douglas. The operation was for a radical mastoid back of the left ear. The little fellow is doing well and will be around with his playmates inside of ten days.

LOSES VALUABLE DOG.

Last Sunday Superintendent W. H. Blackburn lost his Alredale pup. The dog either strayed from home or was stolen. A description of the animal with reward offered can be found under classified advertisements. Mr. Blackburn and his family have become greatly attached to the little dog and are anxious for its return.

FREIGHT RECORD YESTERDAY.

Two cars of coal, National Ice company; one car of coal, Wilkes Warehouse company; one car of coal, Ed Wheece; one car cement, Young Construction company; one car tank material, MacNamara Mining company; one car of wood, B. Cerrutti, and one car mining timbers for the Halifax Mining company.

BORE COMPLETED.

SANTA ROSA, Cal., Nov. 7.—Tunnel crews working from opposite ends of the California Western railroad company's bore between Willets and Fort Bragg met yesterday at the line connecting the Menecast with the outside world, and is virtually completed. It is expected through trains will be running by December 1.

BURGLARS ATTEMPT TO ROB GUGGENHEIM SUMMER HOME

NEW YORK, Nov. 7.—Burglars were frustrated in an attempt to rob the country home of Isaac Guggenheim, the millionaire copper magnate, at Port Washington. They shot and killed the night watchman, and escaped in a boat.

CHRISTIE MAY BE PARDONED FROM PRISON

STRONG ARGUMENT TO BE PRE- SENTED TO BOARD THIS WEEK AT CARSON.

RENO, Nev., Nov. 7.—One of the strongest arguments ever presented to the board of pardons for the release from prison of a convict is to be presented this week at Carson City.

The movement is headed by Justice of the Peace Lee J. Davis, who goes to the Capital city with some splendid letters for presentation before the board of pardons. One of them is from District Attorney Woodburn, who prosecuted the case, but really the strongest is written and signed by H. E. Stewart, who says that he has a position of trust awaiting the former city clerk if he is restored to freedom.

In view of the fact that conviction was gained for an offense consisting of embezzlement of public funds, restored through the bonding company, the letter by Mr. Stewart is expected to have great weight.

Herbert Christie is now, although but a one-armed cripple, the sole support, or would be if given his freedom, of his mother and sisters.

At the last meeting of the board of pardons a lengthy petition was to have been presented. It was signed by some of the heaviest taxpayers of Washoe county, but Mr. Christie did not deem that the time was ripe.

Now that the father of the incarcerated boy has passed away, leaving his family in rather straitened circumstances, although not the fault of the dead man, there are many expressions of sympathy and the wall of opposition to the pardon seems to have been leveled.

Judge Davis will go to Carson City again later in the week to make a personal appeal to the board of pardons.

RESUMED WORK.

With the settlement of the strike at the Veteran mine at Ely work has been resumed on the property. A new superintendent has been appointed and has already opened up the shaft, ordered timbers and started real operations. This will add largely to the payroll of the district and speaks well of affairs in and about Ely.

JEALOUSY CAUSES HIM TO MURDER A WOMAN

HANCOCK, Mich., Nov. 7.—Mrs. Ida Carri, a widow of St. Mary's, a village near here, was shot and killed and Adam Henrickson, a boarder at her home, was seriously wounded last night by a man who

room and forty new venemen ready for examination, the third week of the Dr. B. Clarke Hyde murder trial began yesterday. Attorneys believe the panel of forty-seven temporary jurors will be completed this week. Two days are allowed for exercising peremptory challenges, so it is possible that the first will be heard next week.

ARTESIAN FLOW AT WABUSKA.

A fine flow of artesian water has been struck in the well being bored at Wabuska. The well is down to a depth of 500 feet and the flow comes out of an eight-inch pipe six feet above the surface of the ground registering 129 gallons per minute. The temperature of the water is 68 degrees. This is another demonstration of our contention that artesian water can be found almost anywhere in this valley at the proper depth.—Yerington Times.
